

FEBRUARY AFTER SCHOOL CARE NEWSLETTER

NEW YEAR, NEW WEATHER

DEAR PARENTS,

We had so much fun bringing in the New Year! With the weather outside fluctuating between hot and cold, our theme for January

couldn't have been planned better! We had a blast learning the difference

between hot objects and cold objects. We had a special science experiment with Mrs. Money where we got to learn and feel how polar bears can stay warm even though they live in below freezing temperatures!

GALLOPING INTO FEBRUARY.....

This month the children will be getting down and dirty with some farm animal fun! We are going to have activities exploring roles of a farmer and all the different animals on a farm. From pretending to be different animals to building the barn they live in, February will be filled with exciting and interactive farming activities.

In celebration of National Children's Dental Health Month, the children will attend an in-school field trip to learn about healthy teeth! One of our Day One parents will be coming to teach the children about what foods are good or bad for our teeth and proper care of our pearly whites!

In His Name,
The After School Program Team
